

iSHIELD

Lone worker protector application

- Protection for lone workers
- Automatic and manual alerts
- Emergency alarms
- Individually customisable
- Integrates with powerful MobileView software for advanced functionality

Created to improve worker safety by reducing emergency response time, iSHIELD is a sophisticated software application that runs on any Android-based smartphone. Easy to use and quick to operate in an emergency, iSHIELD integrates with MobileView software to enable real-time monitoring of multiple workers from a single interface; a streamlined solution that protects employees.

Immediate man down alerts

iSHIELD automatically raises an alert if the worker should suffer an impact, fall, or unexpectedly stop moving, including an emergency alarm.

Request help manually

Use the touchscreen or hardware buttons to raise an alert manually – workers can be sure that help is swiftly on the way.

Low power consumption

Doesn't drain the smartphone's battery – over 12 hours of battery life.

Individual customisation

Tailor the settings to suit each user's workflows, enabling quicker man down detection and reducing the risk of false alarms.

Continual location updates

GPS tracking system sends location information to the advanced MobileView software platform, with ongoing monitoring of networks to ensure connectivity – send rescue teams straight to where they're needed.

Convenient and lightweight

Based on a smartphone – no need to carry additional equipment.

Hardware compatibility

The iSHIELD app is Android-based for maximum flexibility of platform, with the settings are adjusted to work with each model of Android smartphone.

Software compatibility

iSHIELD integrates seamlessly with the AeroScout MobileView software, version 5.0 SP1 with nViz gateway and Instant Notifier, to provide a huge range of functionality.

Please contact Extronics to discuss the options available for the iSHIELD app.
